

## Contacts

### Business Development & Licensing

**Jonathan Chriqui**

Director Licensing  
Mobile: +33 6 38 528 445

[jonathan.chriqui@servier.com](mailto:jonathan.chriqui@servier.com)

### Research & Development

**Benoit Tyl, MD**

Director of Opportunities and Translational Medicine  
Mobile: +33 6 07 18 02 62

[benoit.tyl@servier.com](mailto:benoit.tyl@servier.com)

**Stefano Chimenti, Ph.D**

Director of Scouting and External Innovation  
Mobile: +33 6 89 44 30 64

[stefano.chimenti@servier.com](mailto:stefano.chimenti@servier.com)

**Steven Quentzel, MD**

Head of Opportunities  
Mobile: +33 6 07 53 74 19

## Areas of interest

### From Target to late Preclinical stage

Our discovery and research efforts are focused on approaches targeting the following diseases:

#### Heart failure (HFrEF, HFpEF, ADHF)

- Mitochondrial dynamics, mitophagy, and respiratory chain efficiency
- Myocardial stiffness (myocyte stiffness and extracellular matrix dynamics) and fibrosis
- Calcium handling
- Cardiac hypertrophy and anti-remodeling
- Salt and water homeostasis

#### Atrial fibrillation

- Atrial specific single and multichannel acting drugs
- Non-classical cardiomyocyte ion channels
- Myofibroblast-specific ion channels

### Clinical stage

We have a particular interest in research collaborations & licensing deals in:

- Heart failure: acute and chronic HF (HFrEF and HFpEF)
- Cardiomyopathies
- Atrial fibrillation

As well as:

- Hypertension
- Other arrhythmias
- Dyslipidemia
- Venous diseases

## Active Cardiovascular Partnerships

## Partnering with Servier

Partnership is embedded in our culture with highly engaged and diverse teams partnering for a shared purpose — contributing to therapeutic progress to serve patient needs. Our partnership approach serves one goal: to bring life-changing treatments to patients faster. We strive to always put patients first, leading to better outcomes for ourselves and our partners.

## A PARTNER OF CHOICE

### A partner with strong commitment

Servier is an independent pharmaceutical company committed to therapeutic progress to serve patient needs. Its unique governance allows Servier to reinvest all its profits to support its development, as well as plan and invest with a long-term view, in line with its vocation. Servier long-term vision applies to its partnership philosophy.

### A partner with a global presence

With €4.6Bn of revenue in 2018/2019 across 150 countries worldwide, the Group has a growing presence in the USA and Japan, a strong EU presence and a deep knowledge of emerging countries and China.

### A partner with proven expertise and experience

Servier is very focused on specialty care oncology with a proven expertise of over 60 years in cardiovascular and metabolic diseases. It is developing new therapeutic solutions to serve unmet patient needs. From R&D to commercialization, we have proven experience to help new therapeutic innovations become reality for patients, alone or with partners

### A partner you can rely on

Servier is proud of what has been achieved with its partners so far. Servier has a strong track record of providing flexible partnership structures to its many partners, as well as an R&D infrastructure with 2,900 people in France, Hungary and Boston and an extensive commercial knowledge of global markets

## Our areas of interest

### Cardiovascular diseases

- Heart failure (acute and chronic HF)
- Atrial fibrillation
- Systemic hypertension
- Coronary artery disease
- Arrhythmic Cardiomyopathies
- Hyperlipidemia
- Venous diseases

### Metabolism

- Type 2 Diabetes
- NASH
- Diabetic Kidney Diseases
- **Clinical & Marketing Stage:**
  - Diabetic retinopathy
  - Non-injectable Insulins

### Oncology

#### Late stage opportunities

Solid tumors; priority GI (CRC, HCC, pancreas, gastric, esophageal, cholangiocarcinoma)  
Other indications would be considered if biomarker-selected populations exist  
Pediatric cancers  
Hematologic cancers (in particular NHL, ALL and AML)

#### Discovery & Early Clinical Focus

##### Cancer cell Signaling

- Apoptosis (BCL2 family; extrinsic cell death)
- Novel oncogenes, oncogene stability regulators
- Epigenetic regulators (with biomarker validation)
- Synthetic lethality associated with genetic defect

##### Immuno-oncology

- T cell activation
- Immunosuppression
- Innate immunity
- Tumor micro-environment

### Immuno-inflammatory diseases

#### Inflammatory & autoimmune disease

- Lupus
- Primary Sjögren syndrome
- Systemic sclerosis

### Central Nervous System

- Parkinson's disease
- Autism
- Alzheimer's disease
- ALS
- Huntington disease
- Other rare disease in neurodevelopmental and neurodegenerative disorders

### Enabling technologies

- Solutions to improve solubility
- Oral administration of peptides
- Blood-brain barrier penetration systems
- Nose-to-brain delivery solutions
- Cardiac drug delivery
- Micro-needle
- Acid nucleic delivery
- Galenic micro-electronics
- Innovative polymer for improved drug delivery
