Areas of Interest

From target to hit to preclinical stage

We have a particular interest in research collaborations & licensing deals in assets related to autoimmune and fibrotic disorders such as:

- Lupus
- Sjögren syndrome
- Systemic Sclerosis
- And other chronic inflammatory and fibrotic diseases sharing similar pathophysiological mechanisms

Our discovery and research efforts are focused on approaches allowing to better understand these diseases and to target sub-populations:

- Patient stratification
- Biomarkers of diagnosis, efficacy, prognosis, safety
- Tools for immunomonitoring

We have a particular interest in research collaborations & licensing deals in biological drivers of autoimmune and fibrotic disorders:

- Downregulation of Th1 and/or Th17 immune responses
- Upregulation of regulatory responses
- Stimulation of resolution phase

Partnering with Servier

Partnership is embedded in our culture with highly engaged and diverse teams partnering for a shared purpose - contributing to therapeutic progress to serve patient needs. Our partnership approach serves one goal: to bring life-changing treatments to patients faster. We strive to always put patients first, leading to better outcomes for ourselves and our partners.

A partner of choice

A partner with strong commitment

Servier is an independent pharmaceutical company committed to therapeutic progress to serve patient needs. Its unique governance allows Servier to reinvest all its profits to support its development, as well as plan and invest with a long-term view, in line with its vocation. Servier long-term vision applies to its partnership philosophy.

A partner with a global presence

With €4.6Bn of revenue in 2018/2019 across 150 countries worldwide, the Group has a growing presence in the USA and Japan, a strong EU presence and a deep knowledge of emerging countries and China.

A partner with proven expertise and experience

Servier is very focused on specialty care oncology with a proven expertise of over 60 years in cardiovascular and metabolic diseases. It is developing new therapeutic solutions to serve unmet patient needs. From R&D to commercialization, we have proven experience to help new therapeutic innovations become reality for patients, alone or with partners

A partner you can rely on

Servier is proud of what has been achieved with its partners so far. Servier has a strong track record of providing flexible partnership structures to its many partners, as well as an R&D infrastructure with 2,900 people in France, Hungary and Boston and an extensive commercial knowledge of global markets

Our areas of interest

Oncology

Discovery & Early Clinical Focus

Cancer cell Targeting

- Apoptosis (BCL2 family; extrinsic cell death)
- Novel oncogenes, oncogene stability regulators
- Epigenetic regulators (with biomarker validation)
- Synthetic lethality associated with genetic defect

Immuno-oncology

- Stroma/ Tumor micro-environment (e.g., genetically-driven immune contexture)
- T cell activation (e.g. intracellular immune checkpoints)
- Immunosuppression (e.g. Treg targeting)
- Innate immunity (e.g. Type I interferon pathway)

Modalities:

- Small molecules (Discovery to Early Clinical stage)
- mAb/bispecifics (Early Clinical stage)

Late stage and commercial opportunities

- We are actively looking at strengthening our portfolio and licensing-in/acquiring commercial and late-stage products (on market ~2021)

Immuno-inflammation

Inflammatory & autoimmune disease

- Lupus
- Primary Sjögren syndrome
- Systemic sclerosis

Neurosciences

- Synucleinopathies
- Alzheimer's disease
- ALS
- Huntington's disease
- Neurodevelopmental disorders

Cardiovascular diseases

Metabolism

Acquire or license market-ready or mature assets for some geographies
